Chicago Lakeshore Hospital

The expressive therapist is responsible for providing clinical services within Chicago Lakeshore Hospital Inpatient Programs. These services may include assessment, therapy, and treatment plan development.

Therapies may include individual and group as clinically indicated. Our inpatient programs serve a diverse patient population including adolescents and children who may present with behavioral challenges and trauma related symptoms.

The ideal candidate possesses excellent communication skills, basic computer proficiency, ability to manage multiple tasks simultaneously and capacity for effectively managing interpersonal interactions. This position requires regular interfacing with internal treatment team members.
